

# COMPUTERS FOR SOLDIERS

I'm Philip Spry and I started Computers for Soldiers because I know first-hand how hard it is to be separated from the people you love. Our deploying soldiers need to know we care about them, that we remember them, that they aren't forgotten. When I was deployed to Saudi, Iraq and Kuwait during Desert Shield and Desert Storm, one of the highlights of the day was when the mail arrived.

My goal with this program is to provide an affordable computer to the families of troops stationed in harm's way so they can communicate with their soldier via email. I have a couple retail computer stores in Phoenix, AZ and I buy tons of off-lease computers at auctions, so I can afford to put together a full computer package for a price that is significantly below wholesale.

Every system comes ready to use and preloaded with MS Windows XP, office productivity software (word processor, spreadsheet, etc) and anti-virus software. As of October 23rd, McAfee, one of the premier anti-virus software providers, has committed to providing us with free 1-year subscriptions to their software, and they're waiting on me to give them a count of how many we need.

**This offer is only available to the families of deploying troops and may not be used for resale purposes. Please don't abuse this.**

**\$150.00** includes computer, keyboard, mouse, LCD monitor, and software as described above.\*

\* Shipping is extra, but is limited to the shipping cost plus the cost of packing materials. Taxes will be added to AZ orders. Since I'm getting these computers at auction, they won't all look the same, but they'll have the specs below or better.

Off Lease LCD Monitor  
(15" Screen or better)

#### Off-Lease Business Class Computer with:

- Windows XP Home or Professional
- Pentium P4 1.7GHz (or higher) processor
- 512M of RAM
- 40GB Hard Drive
- CD-ROM or better (many CD-RW)
- High-Speed Internet Ready
- Anti-virus software (McAfee when available)

Off Lease Keyboard & Mouse
